PROFESSIONAL SUMMARY

Engineer focused on building reliable systems rather than just writing code. Experience shipping production features across React/Next.js, Go APIs, and WebRTC communication infrastructure used by global users. Strong bias toward ownership, debugging hard problems, and understanding how every layer of a product stack behaves under real usage.

EXPERIENCE

- Graduate Software Engineer — Full Stack | Cooee

Sept 2025 – Present

 - Converted to full-time after a high-performance internship; took ownership of core WebDialer and marketing platform components.
 - Engineered and maintained production-grade international calling flows using WebRTC, socket signaling, and Telnyx, ensuring low-latency and reliable global communication.
 - Built and shipped core product features including international calling, subscription flows, travel data services, and auto top-ups used by thousands of users globally.
 - Developing backend APIs and services in Go to support scalable product integrations and backend workflows.
 - Owned major frontend modules across the Cooee web application using React, Next.js, Tailwind, and Firebase, improving responsiveness and stability in live call scenarios.
 - Led the production migration of the marketing website from WordPress to Next.js, implementing country-specific pages integrated with Sanity CMS and improving performance and SEO.
 - Implemented Google Analytics 4 instrumentation across marketing and product surfaces, enabling funnel analysis, event tracking, and data-driven decision-making.
 - Collaborated with product, design, and backend teams to ship stable production builds each sprint, including integration testing and reliability improvements.
- Software Developer Intern | Benfi Consultants Pte Ltd

Jul 2024 – Nov 2024

 - Developed and optimized backend APIs using Django to support internal business intelligence workflows.
 - Explored and evaluated LLMs (Qwen series) for automating analytics generation and reporting.
 - Contributed to early prototypes of an AI-driven home assistant and analytics tooling.

TECHNICAL SKILLS

Languages : Go, JavaScript, Python, C, Solidity
Frontend : React.js, Next.js, Tailwind CSS, HTML, CSS
Backend & APIs : Go (REST APIs), Express.js, Django
Real-Time Systems : WebRTC, Socket Signaling, Telnyx
Databases & Storage : MySQL, Firebase
Infrastructure & Platforms : Cloudflare, Sanity CMS, Git
Testing & Analytics : Playwright, Google Analytics 4

PROJECTS

- DeCarb: A Carbon Credit Marketplace | Next.js, Tailwind, Express.js, Solidity, Web3Auth, Razorpay

2025

 - Building a decentralized platform for transparent carbon credit trading with a user-friendly dashboard for buying, selling, and retiring credits.
 - Integrated Web3Auth for seamless wallet onboarding and fiat payments using Razorpay to make blockchain interactions accessible to non-crypto users.
 - Implemented secure transaction flows, transaction history views, and Toucan-based retirement certificate visibility.
 - Recognized as Finalist at SIGHT 2.0 (UST) and Runner-up at BlockHash LIVE Ideathon by Kerala Blockchain Academy.
- TEDx Saintgits | Next.js, Tailwind, Express.js, Firebase

Dec 2024

 - Contributed to the official TEDx Saintgits event website, implementing responsive UI and backend logic for ticketing workflows.
 - Improved reliability of event management tooling and streamlined coordination for organizers.
- AlertEye: Real-Time Drowsiness Detection | Python, OpenCV

Oct 2024

 - Developed a real-time driver monitoring system using facial landmark detection to identify drowsiness.
 - Implemented alert mechanisms to notify users and improve road safety in fatigue-prone scenarios.

EDUCATION

Saintgits College of Engineering, Kerala

B.Tech in Computer Science and Engineering (Minor: Robotics and Automation)

CGPA: 8.42

2021 – 2025

Kendriya Vidyalaya Pattom, Thiruvananthapuram

AISSCE — Science Stream (Computer Science)

96%

2020 – 2021

AWARDS & CERTIFICATIONS

Runner-up — Web3 for India 2030 Ideathon | Kerala Blockchain Academy, BlockHash LIVE

2023

Finalist — SIGHT 2.0 | UST

2024

Web Development Bootcamp | Udemy

Programming, Data Structures and Algorithms Using Python | NPTEL

Intel Unnati Summer Internship Program | Intel Corporation
